

# Weekly Coal Production

Energy Information Administration  
Washington, D C

Production for Week Ended:  
April 5, 1986

## Highlights

U.S. coal production in the week ended April 5, 1986, as estimated by the Energy Information Administration, totaled 15.24 million short tons (bituminous coal and lignite, 15.18 million short tons; Pennsylvania anthracite, .06 million short tons). This was 9.2 percent lower than the previous week, and was 11.1 percent lower than production in the corresponding week of 1985. The drop in production since the previous week is partly due to a UMWA holiday

honoring its first president, John Mitchell.

Cumulative U.S. coal production from January 1 through April 5, 1986, was estimated at 230.50 million tons, 0.1 percent below the 230.72 million short tons produced in the comparable period in 1985.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).

**Figure 1. Coal Production**

**Table 1. Coal Production**

Production and Carloadings	Week Ended			Year to Date Ended		
	04/05/86	03/29/86	04/06/85	04/05/86	04/06/85	Percent Change
Production (Thousand Short Tons)						
Bituminous <sup>1/</sup> and Lignite..	15,181	16,712	17,093	229,555	229,770	-0.1
Pennsylvania Anthracite..	62	69	55	946	945	.1
U.S. Total.....	15,243	16,781	17,148	230,501	230,716	-.1
Railroad Cars Loaded.....	100,052	107,908	107,403	1,528,286	1,479,785	

<sup>1/</sup> Includes subbituminous coal.

Notes: 1985 and 1986 data are preliminary. Total may not equal sum of components because of independent rounding.
